

KIT CABLE TIERRA

Grounding Kits are a cost effective way to provide grounding on 400 Series coax cable. These kits are fast and easy to install and feature a pre-formed grounding strap with integral butyl mastic which helps ensure a weatherproof splice. This is designed for use with 400-series coax cable from manufacturers such as CommScope® (WBC-400), Times Microwave Systems® (LMR-400) and Altelicon™ (CA-400).
